STAFF SOFTWARE DEVELOPMENT ENGINEER IN TEST (SDET) | PRINCIPAL QA AUTOMATION ENGINEER

Playwright • TypeScript • Python • CI/CD • AWS • Healthcare • LLM Evaluation

Professional Summary

Hands-on Staff SDET and Principal QA Automation Engineer with 10+ years of experience building enterprise automation frameworks, API validation platforms, cloud testing solutions, and CI/CD quality systems across healthcare, aviation, finance, insurance, automotive, and education domains.

Developed and maintained more than **1,000 end-to-end automated test scenarios** and helped reduce manual regression effort by **over 70%** through scalable automation practices. Collaborated with engineering organizations of **10–20 developers and QA engineers** while remaining deeply involved in software design, automation architecture, and release engineering.

Core Technologies

Playwright, TypeScript, Python, Java, SQL, Selenium, Cypress, Appium, REST Assured, Postman, SoapUI, Docker, Jenkins, GitHub Actions, AWS (EC2, S3, Lambda, Kinesis, API Gateway), PostgreSQL, Snowflake, Linux, RAGAS, LangChain, MCP, OpenSpec.

Professional Experience

DocNow.ai | Staff SDET & AI Quality Engineer | 2025–Present

- Built Playwright and TypeScript frameworks supporting enterprise healthcare workflows.
- Expanded automation coverage to hundreds of critical user journeys and reduced manual release validation efforts.
- Integrated automated quality gates into GitHub Actions pipelines.
- Implemented LLM evaluation processes using RAGAS, LangChain, MCP, and OpenSpec.
- Collaborated across engineering teams to improve testability, observability, and deployment confidence.

Stride Inc. | Principal SDET | 2023–2025

- Developed scalable Playwright automation frameworks for enterprise education platforms.
- Automated API validation using REST Assured and Postman.
- Built SQL and Snowflake validation pipelines supporting large datasets.
- Improved release reliability through CI/CD-driven testing practices.
- Mentored engineers on modern automation standards and framework design.

Bravado Health | Lead QA Automation Engineer | 2021–2023

- Designed cloud-native automation solutions for healthcare applications.
- Implemented AWS-based quality pipelines using S3, Lambda, and backend integrations.
- Expanded UI, API, database, and integration automation coverage across critical workflows.
- Participated in performance validation and enterprise release readiness activities.
- Improved engineering productivity through reusable testing components.

Mindtree Ltd. | Senior QA Consultant | 2017–2021

Client engagements: Southwest Airlines, Delta Air Lines, Toyota Connected, Equifax, Tower Hill Insurance.

- Built enterprise automation frameworks using Playwright, Selenium, Java, Python, and Appium.
- Implemented Jenkins-based CI/CD validation pipelines and Git workflows.
- Validated AWS enterprise systems, connected vehicles, aviation platforms, and financial applications.
- Supported large-scale systems serving millions of users.
- Delivered reusable automation assets adopted across multiple engineering programs.

Technical Skills

Programming: Python, TypeScript, Java, JavaScript, SQL

Automation: Playwright, Selenium, Cypress, Appium, REST Assured, Postman, SoapUI

Cloud & DevOps: Docker, Jenkins, GitHub Actions, AWS EC2, S3, Lambda, Kinesis, API Gateway, Linux, CI/CD

Databases: PostgreSQL, MySQL, SQL Server, Snowflake

AI & LLM Quality: RAGAS, LangChain, MCP, OpenSpec, Prompt Engineering, Retrieval Quality Validation

Education

Master of Science in Information Technology Project Management — Northeastern University

Professional Certifications

Data Science for Business — Harvard University

Software Product Management — University of Alberta

Leadership Specialization — HEC Paris

Selected Career Highlights

- 10+ years of enterprise software quality engineering experience.
- 1,000+ end-to-end automated tests designed, implemented, and maintained.
- 70%+ reduction in manual regression effort through automation initiatives.
- Commercial experience with Docker, Jenkins, GitHub Actions, and AWS services.
- Strong fit for Staff SDET, Principal QA Automation Engineer, and Senior Automation Architect roles.
