ALEX GRANT

Staff SDET & AI Quality Engineer | Principal QA Automation Engineer

Tampa, Florida | alexeymspm@gmail.com | linkedin.com/in/alex-grant-b14779a8 | github.com/alex-g7

PROFESSIONAL SUMMARY

Staff SDET and AI Quality Engineer with 10+ years of experience designing test automation architecture, CI/CD quality systems, API validation, and enterprise quality engineering solutions across healthcare, aviation, finance, insurance, automotive, and education. Built and maintained 100,000+ automated end to end scenarios and helped reduce manual regression effort by more than 70%. Experienced in Playwright and TypeScript automation infrastructure, API and database validation, performance testing, release quality gates, and AI assisted engineering workflows. Strong background leading QA organizations and collaborating with distributed engineering teams of 10 to 20+ developers and QA engineers.

CORE EXPERTISE

Test Automation: Playwright, Selenium, Cypress, Appium, REST Assured, Postman, SoapUI, Cucumber, PyTest
Programming: TypeScript, JavaScript, Python, Java, SQL
AI Quality Engineering: LLM Evaluation, RAGAS, LangChain, Claude AI, OpenAI, GitHub Copilot, Cursor, MCP, OpenSpec, AI Assisted Testing
API & Backend: REST APIs, SOAP, Integration Testing, Contract Validation, Database Testing
Performance & Reliability: k6, Load Testing, Performance Testing, Observability, Server Logging, Reliability Validation
DevOps & Cloud: AWS, Docker, GitHub Actions, Jenkins, CI/CD, Linux
Quality Leadership: QA Strategy, Test Architecture, Quality Gates, Release Readiness, Risk Analysis, Defect Triage, Mentoring, Code Reviews

PROFESSIONAL EXPERIENCE

Staff SDET & AI Quality Engineer | DocNow EHR | **Mar 2025 - Present**

- Define quality engineering strategy and technical direction for automation across a post acute EHR platform serving long term care and healthcare organizations.
- Design scalable Playwright, TypeScript, and JavaScript test infrastructure covering UI, API, integration, database, and end to end validation across critical clinical workflows.
- Expanded automated coverage to hundreds of critical user journeys, reducing manual release validation effort and improving deployment confidence.
- Integrated automated quality gates, regression validation, and release readiness checks into GitHub Actions CI/CD pipelines.
- Provide hands on technical leadership and mentoring across QA and engineering teams, including automation architecture, testability improvements, code reviews, and release readiness.
- Introduced AI assisted engineering and quality workflows using Claude, GitHub Copilot, MCP, and OpenSpec.
- Implemented LLM evaluation processes using RAGAS and LangChain to support validation of AI powered clinical and documentation capabilities.
- Developed performance and load testing strategy to identify scalability bottlenecks, establish baseline performance metrics, and improve system reliability.
- Support quality engineering across integrations including PointClickCare, MatrixCare, telehealth, ePrescribing, reporting, analytics, and more than 20 practice management and RCM systems.
- Collaborate across product and engineering teams to improve testability, observability, reliability, and deployment confidence for workflows focused on reducing clinician documentation burden.

Principal SDET | Stride, Inc. | **Feb 2023 - Jan 2025 (2 yrs)**

- Provided technical direction for test automation architecture across enterprise digital education platforms operating at significant scale.
- Designed and evolved scalable Playwright and TypeScript automation frameworks covering UI, API, integration, and end to end testing.
- Built automated API validation using REST Assured and Postman, improving coverage across service and integration layers.
- Developed SQL and Snowflake validation workflows for large data pipelines, backend services, and data intensive product features.
- Integrated automated regression and quality validation into CI/CD pipelines to improve release reliability and shorten feedback cycles.
- Improved test infrastructure, reusable automation components, test data strategies, and engineering standards across multiple product areas.

- Mentored SDETs and engineers on automation architecture, framework design, code quality, testability, and modern quality engineering practices.
- Supported quality engineering for education technology operating at substantial scale.

Lead QA Automation Engineer | Bravado Health | **Oct 2021 - Feb 2023 (1 yr 5 mos)**

- Led automation engineering for healthcare applications supporting ePrescribing, clinical workflows, APIs, and patient facing services.
- Designed cloud based automation architecture covering UI, API, database, integration, and end to end validation.
- Built AWS based quality solutions using S3, Lambda, backend services, and cloud integrations.
- Expanded automated coverage across critical healthcare workflows and developed reusable testing components that improved engineering productivity.
- Integrated automated validation into CI/CD workflows to provide faster feedback and improve release readiness.
- Developed API and backend validation for healthcare integrations, including ePrescribing workflows and external services.
- Contributed to performance, reliability, integration, and enterprise release validation for HIPAA regulated healthcare applications.
- Worked closely with developers, product teams, and QA engineers to improve testability, defect prevention, automation coverage, and release confidence.

Senior Quality Assurance Consultant | Mindtree | **Oct 2017 - Sep 2021 (4 yrs)**

Client engagements: Southwest Airlines, Delta Air Lines, Toyota Connected, Equifax, Tower Hill Insurance

- Delivered quality engineering and automation solutions across aviation, automotive, financial services, insurance, and enterprise technology programs.
- Designed and maintained automation frameworks using Selenium, Java, Python, Appium, and modern web testing technologies.
- Built UI, API, mobile, integration, and backend validation for complex enterprise applications.
- Implemented Jenkins based CI/CD validation pipelines and Git based engineering workflows to provide faster automated feedback.
- Validated AWS based systems, connected vehicle platforms, airline applications, financial services, and large scale enterprise integrations.
- Developed reusable automation libraries and testing components adopted across multiple engineering programs.
- Worked directly with client engineering and product teams to define test strategy, improve testability, investigate complex defects, and support production releases.
- Contributed to quality engineering for high traffic, business critical systems used across major aviation, automotive, financial, and insurance organizations.

SELECTED ENGINEERING IMPACT

- 100,000+ automated scenarios designed, implemented, or maintained across enterprise applications.
- 70%+ reduction in manual regression effort through scalable automation and continuous testing practices.
- Quality engineering experience across healthcare, aviation, finance, insurance, automotive, and education.
- Technical leadership across distributed engineering and QA organizations of 10 to 20+ professionals.
- Automation spanning UI, API, database, mobile, integration, performance, and AI powered systems.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL
Automation: Playwright, Selenium WebDriver, Cypress, Appium, REST Assured, PyTest, Cucumber
AI & LLM: OpenAI, Claude AI, RAGAS, LangChain, MCP, OpenSpec, GitHub Copilot, Cursor
Performance: k6, Performance Testing, Load Testing
Databases: PostgreSQL, MySQL, Microsoft SQL Server, Snowflake
Cloud & DevOps: AWS, Docker, GitHub Actions, Jenkins, CI/CD, Linux
Engineering Practices: Test Architecture, Shift Left Testing, Quality Gates, Code Review, Risk Based Testing, Root Cause Analysis, Specification Driven Development, Observability

EDUCATION

Northeastern University - Master of Science, Information Technology Project Management
Pavlodar State Pedagogical Institute - Undergraduate Degree
Harvard University - Data Science for Business
University of Alberta - Software Product Management
HEC Paris - Leadership Specialization
